McGill College  
Montreal

Dear Sir

Your name has been presented to me as having made some study of the Canadian Apalites, & I therefore write you to inquire if you are familiar with the deposits near Ottawa & could make an examination & test a certain property there of about 200 acres to determine an approximate amount of the deposit on land & the financial value of the property, I having in view with others the purchase & working of same if the examination warrants it. If so, please state your terms for making such examination & how soon you could commence operations, but if out of your line, will you kindly refer me to a first class & reliable party fully competent to advise as the information desired. - I

may say that a number of beds (about  
20) have already been opened. - Also  
please state in your reply if snow  
made interference or be seriously  
objectionable in making the examination.  
An early reply is desirable, awaiting  
which I am

Yrs. Truly  
E. C. Husley,

April 10/85
