Dear George

Many thanks for
the blimpie tubes, which is
just the thing. The casts
of electrotypes arrived to day,
just in time. Prof's Fall
has also arrived & I will
attend to it as soon as the
Kelner comes. I enclose
a note to Dallas about
the paper on Prophets. We
may go on with it, as I
cannot send the specimens
a box of it with me. It be-
longs to a person in the
U States who will not
part with it for less than
\$100 and I shall have
to return it to him soon,
as I cannot afford
to pay so much for it.

Have sent my set of letters from the printing

I am making promising
slow progress with my
German plants; but at
all hazards I must have
them ready in April

I have no doubt that
you will find the practice
of chemistry tedious. I
found it very much so. Still
one must plod on with
it. It is the only way. I
only hope that your strength
will hold out and
that I shall see you
in April well and
healthy. I shall send
you some more money at the
New Year with full directions
as to drawing it out. ~~Mamma~~
Must give you all news
as I have no time.
