

We give love
 Lucy & Co

My dear George

We have received
 your last letter informing
 us about the meeting of
 the feet society &c; and
 are rejoiced to hear of
 your continued welfare.
 We all send you sincere
 love, and all the good
 wishes of the season.
 I am glad you have
 seen Parker, and
 shall be glad if he
 will look at any of
 your more critical
 papers. Perhaps when
 you have them printed

he might think them worth some
remuneration & some newspapers being he
had a letter from Mr Daines to day,
in which he speaks favourably of your
lecture an answer to it.

I read in this a bill exchange
for £20. You have any to take it to
the Savings Bank where your money is,
and write your name across the
back of it, when they will please
it to your credit, if you please.

Suppose so. If they desire you may
have to take it to the Union Bank

and get it accepted in this case

or try to find a more recent friend and

send it to you with me to certify that

you are the person. There is also

an opinion that you will have this

trouble, so just ask the Bank

people to put it to your credit

and mark it on your book, I have

not seen Mr Cabot the £10 from Durbaker

but I suppose it to be some matter of

shells and you may just consider

it a part of your money, just pay it

into the Bank or bring it as may be

convenient. I shall arrange about it here.

In sending the present certificate
I do not suppose that your money will be
exhausted; but I always think it good when

anything is going on at a dis-
tance & have means enough
on the spot; and the money
may be at interest in the
Savings Bank until it is
wanted. I also wish you
to make the following small
payments for me to Mr
W. W. Lighter, clerk of the
Geological Society, Somerset
House.

Subscription & Publ. Socy	21/
— — — — — Ray Socy	21/
— — — — — Geol Fund	16/
	£ 2.18/

For which he will give you
receipts, which you can
keep till I come. You can
send the amt with the enclosed
note or take it just as you like
— no hurry about it.

I shall enclose a letter
of thanks to Annie & George &
pleas it to mamma
and the others & tell news.
Ever your loving father
W. Darwin
