Dear Capt. Cameron

I yesterday mailed the first part of my Geological Report of Progress treating of the Lynton Tertiary formation & giving such analyses & examinations of the Lynton & ours as I have been able to make. The report on the Lake of Woods region is in an advanced stage of preparation & as soon as possible it shall be sent also. Maps & diagrams of sections &c. I am also preparing but they will require more time for completion & may be added in the form of an appendix.

I am embodying ~~for the present~~ general observations with regard to the nature of country passed over in the form of an itinerary for the

present-but should like in a final
report to recast them & add collateral
information from other sources ~~in the form of~~
so as to form a more complete & useful
report; should be glad to have any suggestions which
occur to you on points to which special attention
I also hope to have completed lists ^{should be drawn} of the
plants & some of the other collections of last
summer before the end of next month.

Should you think it desirable to print the report
if proper, or any part of it it might be done
here at a rate probably not exceeding one dollar
per manuscript page - ~~or any~~ otherwise

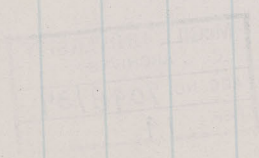

with your permission I should like to have
~~two copies of~~ ^{made} made of my draft here
& two copies of ~~made~~ ^{made} made of my draft here
one of which might be deposited with
Mr Selwyn director of the Geological Survey &
the other sent to the committee of the Interior

in case ~~reparation~~ to secure priority for the
observations & in case of suspension being
desired for railway projects.

Yours very truly
M. Dawson

Capt Cameron R.
Commissioner B.N.C. Boundary Comr.
