

M. Gill College.  
Montreal.

June 19/74

Dear Sir,

I enclose a  
letter just received  
from Dr. C. D. Bell in  
which he speaks  
well of your paper  
on the Aquatic Testis.  
Please keep the letter  
if you can, as we  
cannot hope to have  
many more from the  
first old man.

We are all  
well here — the

weather up to this  
time quite wet &  
cool, and some clearing  
going on acting. Presque  
is here, unimpaired as  
usual and altogether  
done in the month.  
I have sent out the  
bill of the Report of  
Wald, but there is not  
time yet for an  
examination. William we  
believe is at work  
in Cape Breton, but  
we have had no  
letter for a week.  
With all love and prayers  
for you we remain your loving father  
W. Adams.
