

Little Nets

July 24/75

Dear George,

Anna and I

arrived here safely  
on Tuesday night -

rather Wednesday

morning about 2 PM

and found all well

and the place ever  
joyful. I had to stay

here with me the Prof.

of depart, but sent it

up by next mail on

arrival. There have been  
boxed and sent up  
proof of several plates  
of seed of Plants - more  
of it - and of copies of the  
pendix. Rankine and  
I went over and ar-  
ranged the Index and  
it has been sent this  
morning. Your postal  
card from Frontier  
arrived yesterday morning  
and we were glad  
to hear of your welfare

So far, strange enough  
no letter from William  
last mail. We suppose  
however that on the  
continent he has  
missed a mail. Still  
he ought to have written  
on leaving London.  
The last mail brought  
news of the death  
of an old friend of  
James of Regent's Park  
College.

The Engineer as  
Pall Mall Gazette

come as usual and  
I shall forward them  
to you at Victoria, via  
Cp per direct steamer,  
fruits now as it is  
a rainy day but we  
have something to  
add on Monday  
as this cannot be  
till then. Mamma  
and all are in love  
to you. Your affectionate  
father
