

July 22.

Dear George

I enclose a Scrap  
Book that I have ordered the  
books for sent for. Deane  
is to send them direct to  
you. I see they are coming  
quarters about Alaska Thurs-  
day at Ottawa. Mr. Deane  
has says the specimens are  
wedding back. The plants  
from Usher are all right. I  
sent the duplicates of the  
lot with Cameron. The originals  
are here; but Cameron has  
a copy of Usher's notes with her  
presence. I have partly looked  
over the specimens of plants.  
and will do so again more  
carefully soon, and make  
notes of them. They are in  
small letters and not unlike  
Deane's Alaska plants. The  
Blanchet's ones have several  
different species from the others  
but some the same.

I shall be able to write more fully  
about them in a week or two  
of your job time, and shall make  
a little Report on them to be added  
to yours. The seeds you refer to, and  
nuts have come quite fresh, and  
are very interesting. I think they can  
be correlated with some of the leaves!  
Ever yours  
Asputantia

G.D.
