

Asylum

London.

July 29. 76.

My dear Dawson,

Yours of the 2nd
came to hand all O.K.
Many thanks for the same.
I have written Prof. Maxon
about the plants, offering
the use of mine, provided
they are sent back
uninjured, if he wishes
and asking him in
any case would be
kind naming them for me.

as yet I have had
no answer.

I see you have not
lost your old knack
of sketching - I can't
say the likeness is a
flattering one as regards
figure, the face, fortunately
perhaps, you have
not shown.

At last I have got
my pictures from
Topley. They came
to hand about a
fortnight ago, as no
one accompanied them

I have written down
to ask what the damage
might be.

My marriage has brought
me results in the
shape of an seizure.
Not much fortune to
leave her as yet.

Has the B.C. winter been
anything like the one
we have had here -
no snow, and very
little frost.

Dr Lett being on leave
I am doing double
work just now, which

must be my excuse
for the brevity of
this epistle. In haste

Very truly yours,

J. W. Burgess
