

Little Notes
Sept 4/87

My dear George,

Your welcome but long delayed letter arrived yesterday evening having been no less than 40 days on the way. We were all delighted to receive it and hope that by this time there is another on the way telling us of your safe return from your western journey. Eva is delighted with your letter & sketches and she showed to several young friends who were at our home last evening.

I shall take care of your note about the Laraine or Cretaceous and hope that your observations will be verified on the matter so that this troublesome question may be settled.

It would be very important to
 secure every possible shred of
 fossil from the Laramie or
 the pseudo-Laramie of the
 Cretaceous as it will come to
 be a very nice point to separate
 them and some interesting
 may be expected. If you
 can secure collections from these
 beds and can place the
 plants in my hands, I would
 endeavor to send the several
 leaves I have, some are
 laid out & displayed at the
 American Association West Summer
 when we will have a great
 gathering of American geologists.

I am to leave here for
 Genoa to a number morning taking
 care with me and getting
 the Montreal house a going, with

her help: however the Hampton women
or shut some cups as the weather is still
hot in town and pleasant here;

Mr. Frank you may wish for your
delays in keeping us informed of your movements
when you have on the work. I think I mentioned

that you two letters left on sticks as well as
those left with the carbonary party reached on
day and impinged every ~~bit~~ in half the time
or up it took the no dead letter to come.

So the stick on the table seems to be the
most speedy arrangement. The letters posted
on the train are sent immediately and we have
kept the envelopes as well, from your house

When the railway was ⁴ finished the repairs
were in with leaving in a measure.

Some good makes and broggs so with
you clean paper in all your workings and and
help you make like tend to small good and
then you will be spared to return & as in
health and strength as in former times,
hence sent up from 16 lines of rails for the
big de chabon which will be ready in 12 months
and support with all the rails, the best iron
of the state & have a pretty big house
with all the iron etc.

Your appointment with
Mr. B. B. B.
