M. Gill College.  
Montreal.

March 9, /85-

My dear Judge,

I have been taking  
little preliminary looks at  
your road plants and  
arranging them in  
collecting trees all  
according to kinds &  
localities, and am  
inclined to wish first  
at the present set, that  
what has such a marine  
look, I wish you had  
the horizon fixed by our  
oral fossils and the  
stratigraphy since between

Department of Geology

These beds and  
those with rugose specimens  
leaves. I found he  
very curious to find  
the place where the  
morose flora went  
out and the modern  
came in.

Write now however  
& make a suggestion  
Huberer the old German  
artist is understood  
out of work. I have  
tried it de to

engage him to make  
some drawings of  
the principal fountains  
ready to transfer to  
stone. They are rather  
too dark to photograph,  
and if any are used  
not nearly as much.  
I dare say the Royal  
Society would pay  
the cost of a few  
plates, and in the  
mean time you in  
I might advance

the money. If you  
think well of this  
I would give the old  
man some of the  
pounds to draw while  
he is idle. Please  
say what you think,  
perhaps the Sunday would  
prefer to do the work,  
if you can come to see us on Saturday  
the evening will give them

I think Matheson  
Matheson, one  
of your young  
honourable  
of my Geology students, who  
has written to Dr Selwyn  
asking employment. I can  
recommend him of such  
a man is wanted, and  
he would be glad in ever yours  
any case to have an  
answer.  
Madame
