

McGILL UNIVERSITY  
ARCHIVES  
ACC. NO. 909A/10  
REF. 20

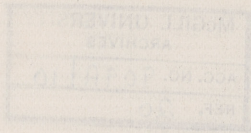

Nov 21/87

Dear Surge,

I received your  
letter of Saturday and  
thank very much we could  
not receive you with  
us on that day, hope  
for next Saturday.

I have looked  
at the fruits basket.  
There is a white stone  
from Lewis there are  
apparently principally

17/15/07  
a *Fareochium* and  
*Syplachna* the same  
with two of Heer's  
species from England  
Ireland and Sibiria. Heer  
calls these *Urocera*  
but from the unrecalled  
leaves I have always  
supposed them to  
be of the age of  
the *Saracenia*.  
The leaves are

The black shales  
from Pelly are more  
doubtful and are  
very imperfect. They  
may be about the  
same age with the  
Lewis River plants  
or may be older.  
Sometimes I think them  
the Mackenzie River  
and Alaska bit  
and at others

more like Vancouver  
I'd I shall endeavor  
to study them more  
carefully ~~next~~ <sup>this</sup> week

I send you a catalog  
of Works. At  
Page 23 there are two  
other pamphlets which  
you might perhaps want  
I hope to send you  
also this week to  
him.

Ever yours  
Madison
