Dear George,

I have just recd your note of Monday, + I am very sorry you do not expect to be here. My turn as a witness has come on early, + I have been in the box all day today with the prospect of a good deal more of it. Mr. Murray has now left here but I will forward your letter to him. I hope your arrangements are now satis:

factory for a start. Please let me
hear from you when you can, as
I will be anxious to know your
abouts.

Mr. Oppenheimer has spoken to
me about City Engineering matters,
but I have so far been unable to
give it any serious attention. They
have decided to appoint a "Consulting
Engineer"; & he seems wishful to secure
me for the place.

Believe me,

Yours affectionate brother

William.
