

Banks

To Sarge
Regeal Chem.

Sept 13/89

Dear Sarge,

Your recent
Memo about Brazil
has set me thinking
again respecting my own
affairs. If you were
to go to Brazil and
perhaps there like poor
Hartt I should have
no Sweeney executor.
Besides I must have
some relief next year

and the most desirable
Plan seems to be to
secure a Professor or
Lecturer in Geology
and continue as
Principal with reduced
Salary. The whole
income of my Chair
of Geology & Zoology
is £2800. This would
be a fair thing for a
New man even if
he had to begin with

of Mr Cunell. I do
not wish anything
said of this, but
please think of
it.

I may perhaps
have to put up
with a more an-
ostant; but
woud like more
they better,

Y^{rs}

Up say \$2000, and
if necessary I could
continue the Fobys
lectures for a time.

If you could take
the work I would
be glad to retire
in your favor.

If not can you
name any one
especially if one
you had who
would do. What
