

McGill College.
Montreal.

Sept 3/91

Dear George,

I have got back
as you will see to the
old post, and received
your welcome letter of
Aug 5 yesterday. I should
have written more
papers, but was advised
by a telegram which stated
that the Am Cours had
returned and that you
were expected in a day
or two, so I wanted to
hear of your actual
arrival. Give your

the Times with an in-
teresting address of
Higgins on Astronomy.
Fletcher has found
in the Upper Cretaceous
series some curious fossil
plants which may
be an older flora
than any hitherto
known in Canada.
I have heard nothing
of the proceedings of
the Great Synoptic
meetings in Washington.

but no doubt there
will be some reports
from.

I hope arrival
at Exmouth per
will telegraph, so that
I may know where to
address you.

I have departed Inf
& August sailing in the
Merchants' Branch,

Ever yours

J. M. Dawson
