Dearest-George -

Thank you  
much for the papers with  
pictures, some of them are  
very attractive - then again  
one often wonders what  
induces people to paint  
such uninteresting subjects.

I sh<sup>d</sup> congratulate you  
upon having done your  
dénair so well in regard  
to the Royal Society. I  
am sure you must be  
relied to have it - so well  
over -

I am very sorry to tell  
you that after your kind  
ness in arranging for Eric to  
go with you - I fear it will

not be possible. I had  
built so many hopes upon  
this living act of - dears Vif-  
<sup>it</sup> & have been accomplished  
months ago it - w<sup>d</sup> perhaps have  
been better - but - the last  
has been so very nearly  
lately, that it - w<sup>d</sup> not do  
to burden you with the  
care of him - I have been  
very uneasy about him for  
a long time. & Dr Rodolick  
& Dr Birket continually  
assured me there was nothing  
specifically amiss with him  
I begged them to see that  
his heart & lungs were right.  
I so on - but - till a week  
ago when I absolutely insisted  
upon Dr Braune thoroughly  
investigating him - I don't think  
it - has been done - & he says  
he is altogether too run  
down to leave home, which  
coincides with my own opinion  
The last time in looking

properly after him, received get. he would  
buy me too - I have received if - may be, as  
in fact - they may regard to do, however  
& he will rather do it - I would do so  
I had - you know at - me, in case of  
may find - you to my miscommer - than  
about - speak about this, even to W. P. L. it  
we know more definitely -  
So do all - you -  
with much love

Love
