

Jan. 16/95-

My dear G. Dawson.

Please allow me to congratulate you most heartily on your appointment as Director of the Geological Survey - I have just heard the news from Mr. Low, although of course we have all looked forward to the change for some time -

I am sure everyone rejoices at the wise appointment which the Government has

made and feels confident that under your direction  
the Survey will prove eminently useful and in every  
way successful.

Many kind inquiries for you were made by the various  
members attending the meeting of the American Geographical  
Society at Baltimore at Christmas time - Gilbert and  
Stanley Bonson desired especially to be remembered to you  
& hope to be in Ottawa before very long to congratulate

you in person -

I am making arrangements to go to Europe this summer  
to continue my geological studies in the crystalline  
and metamorphic rocks of the Alps and of Norway, with Heim  
and Penck. Write best wishes, Samson -

Yours most sincerely,  
Frank B. Adams
