

295. University St.  
Montreal.Thursday  
28 Oct

Dear George,

I have made with  
this M.S. of paper on Lepidoptera  
philosis for Regue Society, and  
have written to Dr. Bonnet  
that you will forward it to  
you. I think it is in state  
fit for printing, and that  
any further corrections may  
be made in the proof.  
I have not got it through  
with aid of mamma, Anna  
and Miss Gardner; and regard  
it as probably my last geo-  
logical paper.

The blocks of the illustrations  
are all ready for the printer  
and I am not waiting for them  
from Bowditch as to what  
printing office they are to go  
to, I propose that the  
plates shall have only  
numbers to give them the  
place of the page  
and have all the titles  
in the list of illustrations  
in the end of the paper.

Ever yours

W.D.

Handwritten text, likely bleed-through from the reverse side of the page.  
The text is written in cursive and is difficult to decipher due to its orientation and fading. It appears to contain several lines of text, possibly including names and dates, but the specific words are illegible.

Handwritten text, possibly a signature or a date, located below the main block of text.

Handwritten text, possibly a signature or a date, located at the bottom left of the page.
