My dear George

I almost regret
having told Will of your father's
last attack as it was a slight
one & a Utt in less of twenty four
hours appeared to restore any strain
or strength, & his limbs continue
to get more ~~or~~ power, as certainly
do not lose power. Dr Blackwell
is very kind & attentive on Sunday
he brought Dr Stewart & Dr Deeks.

the letter an account of his having
 been three times with paper super-
 seded of these attacks had altogether
 runner off, & was better able to
 take (medically) the account of ex-
 haustion they give &c. They know
 they cannot do much either to cure
 or ease, but lovingly desire to do
 anything that skill or perhaps can
 suggest to make him comfortable.
 They are quite willing that his desire
 to go out for a drive should be
 gratified, and they are not willing
 he should try to walk down stairs
