

295. University St.
Montreal.

Dec 9th 1900

Dear George - I looked at them
the other day & there are an end-
less variety from abt 6 to \$10.00
the two I liked best - of the lacers
priced were a very obvious variety
of basket-work with cushions
seat & a curious little fancy
sheep with very upright legs -
But alas! for the entire desk -
there is not a little one to be found
here unless it arrive in some
cases to come in this week. They
are a novelty in London. I am
sorry, for I was so delighted
with a really useful idea
if I have another I will let you
know. - Claire will be very
pleased to execute commissions
Miss Florence, at least news
was still overland & the baby
invalid - hence at home with
head cold & so on - I write in
it do something for her, but
suppose it must be delayed, as
she is out of the way.
Now you may see it off sending

anything to read - she seems
also to want a little heartening
& wonders if she has heard "Wild
Animals I have known" - It
will be very interesting to her
if she has not a really fine
thank for children old & young.

Conrad has finished "The
Cruise of the Cachelot" I have
read parts & will give it to
Bernard who will delight in
it, he has lately read 3 years
before the mast, & enjoyed it -
so his sea knowledge will be
extended a bit. He has come
under the Kentucky spell & it is very
well as far as it goes, at a
certain stage.

We were shocked to hear
of Mr Armstrong's death, the one
who succeeded Dr Boney as prof.
of Engineering - He had been ill
for some time unable to begin
his winter classes in Edinburgh.

Will you not be down till
N. m. - I half thought you would
be here Saturday - I to move
to 1136 Sherbrooke St on Saturday.
& hope she is not frozen out to-
day as her delicate "uncleams"
are not yet on -

One misses papa at N. m.
time, he was always so anxious

any thing to be - the same
also I want a little assistance
I would like to see how the
University of Pennsylvania - I
but the very interesting to me
if the has not a small fine
book for, whether or not
Carter has finished the
series of the "Cochet" I have
read part 1 with great interest
I would like to see the other parts
it has been lately read I am
before the work is completed it
as his own knowledge will be
interested a bit. It has been
under the study of it is very
well as far as it goes, of a
certain scope.

We were shocked to hear
of the death of Dr. Carter, the one
who has been very much
of importance - the fact that he
has been in the world to begin
his scientific career in Philadelphia
to see you not to clear the
Mr. ... I hope through you we
in the laboratory of the University
to 1180 ...
of help in not proper and to
the ...
the ...
the ...
