

as to the necessity for
this precaution - as in the
presence of Typhoid it is as
apt to run into pneumonia.
I am quite troubled about
you. I am sure such a
severe attack as the
occurrence of the former
will - you - I am
of course. Well it is
quite well - ~~at present~~
with much love - Mother,

295 University St
Montreal.

the letter I now enclose. When
he was here in the autumn
he spoke to me about your
father's lot in the old Pictou
Cemetery - now superseded by
a new one - telling that as he
had several more relatives buried
there he had a man there he

sent previously, to tidy up his
 father's laws & there he hoped
 that I would allow^{him} the privilege
 of continuing this & take no notice
 of the tripling cost. As he has enclosed
 an account I am at a loss to know
 whether it is to reassure me of the
 small sum it costs, or regrets, or
 has perhaps what he presses
 upon me to allow him to do. As
 to putting grace on the law, I never
 saw this done, but am sure I would
 not choose it - planting one or
 two trees will be more to my taste.
 Could you give me any guidance

Especially about the money?

Yesterday I received another state
memo fr. the D. Appleton Co. Since
the previous one 25. Copies of "The
History of plants" has been sent &
for this they send \$4-35.

Clara may now be called well, altho'
she has to continue to be careful
in her every movement. Sadya's
is in bed, suspiciously, as if gripe
was beginning. The others are well,
including Eva, fr. whom I had a
letter today. Mrs. Redpath had
an attack of paralysis last Saturday - right
side affected. I speak of mind clear.
Dr. Shepherd says, a very unusual case.

She was slightly better yesterday. There is no end of illness & accidents. It is some time since Mrs. Mc. Lemmon broke her leg, here she has not yet been allowed to move for the one position. Mrs. Mitchell, a halibut lawyer a few days ago & broke her leg. Dr. Peterson & boys have succumbed to gripe. This will seem a favorable time for doctors but as I have not seen Parkins or Gb for the past week I do not know if any case has been put into his care. I beseech you dearest George to be especially careful & lay up if the slightest indication of Colic, or gripe, show themselves. Mornings are being emphasized on all hands
