

M. Gill College,
Montreal.

July 21/91

Dear Genl,

I congratulate
you success in the
Bryce medal, which is
a great honour, and
I hope will be a pre-
lude to the R.S. Fellowship.
I knew some time ago
that such a proposal
was to be made, but
nothing till yesterday
as to result, I would
indeed like to write you
I was at Cooperstown,

No one I should think
would be better as a
representation than Hicks
who knows you well;
but you should
write a short letter of
thanks which he
might read and
in which you might
refer to your having
been highly and
repeatedly thanked
by him.

At the expectation
yesterday (quite without
notice to me) the

representatives of the
graduates named a
degree of LL.D to your
House some in very
favorable terms by
Parland, and will
be voted on at the
April Meeting. I hope
you will willingly welcome
the honor.

I enclose Hook's
letter,

I have not yet seen
Styell's article, but hope
I have it this week.
I know he mixes up

Apparent stages of
the Pleistocene and
early modern. I have
tried to keep your
light on this and
to show how that
the Pleistocene sub-
mergences can have
had nothing to do with
the Post-Pleistocene
stage of the early
human period; but
you about me say I
fail. I have not
succeeded.

Ever yours

J. M. Dawson

The Sup is appearing again. Please take true quinine. J. M. D.
