My dear Sir

Your letter of 15th. ult. has just reached me here. I have also received a communication dated 22nd. November last to the same effect from the Hon. Recording Secretary of the Natural History Society. I am very sensible of the honour done me at the meeting you refer to in electing me as President of the Council of the Committee of Citizens for the reception of the Royal Society of Canada in Montreal in May next and as I have already intimated to Mr. Holden it will give me pleasure to do anything which may be in my power to forward the views of the Citizens of Montreal in this respect.

Very truly yours

Enclosed is the substance of the

My dear Sir

May I ask you to  
be kind enough to  
state at the Council  
meeting this afternoon that  
Dr Mac Nepp of Halifax  
who has consented to give  
one of the public lectures  
on behalf of the Royal Society  
of Canada - has asked to  
give him the dimensions  
of the Hall (and of the platform)  
in which he is to lecture.

This is necessary in order  
to make arrangements for  
his experiments - requiring an  
electric light and a screen  
for projection work - The  
College will provide most  
of the apparatus - He has

John W. not be present  
this afternoon at the  
Council meeting - not  
feeling quite well  
the end on the 28th  
JW

Mentioned to me that it would  
be very desirable that his  
assistant (one of the tutors  
in Balhousie College) should  
be in Montreal to aid him  
with the experiments.  
Probably <sup>the proper</sup> might be able  
to make such arrangements  
as would prevent any  
expense connected with the  
assistant's presence here  
falling on Dr Macfarlan.

Yours very truly

Shepard's J. J. J.

P.S. The Council, I presume  
would refer to the above  
matter to the Committee  
to whom they belong.

It is agreed between the sender of the following message and this Company that the said Company shall not be liable for damages arising from failure to transmit or deliver, or from any error in the transmission or delivery of an unrepeatable telegram, whether happening from negligence of its servants or otherwise, or for delays from interruption in the working of its lines, for errors in cipher or obscure messages, or for errors from illegible writing, beyond the amount received for sending the same.
