McGILL UNIVERSITY  
MONTREAL

Jan. 16 / 63

Dear Dr. Griffith,

It was some thirty-one years ago that I was taken on as "cashier" in the Out-Patient Department of the Homoeopathic Hospital, thus beginning my interest in medicine. If it had not been for the emptying of all those K-basins after tonsillectomies I might never have gone on to nursing. I remember your father used to stop and ask me for the

then customary 50<sup>¢</sup> fee for  
patients, on his way in  
and out!

Do you still go up to  
Les Isles?

Yours very sincerely,

Margaret Buckley

McGILL UNIVERSITY  
MONTREAL

The Medical Library,  
3640 University St.,  
Montreal 2.  
January 16, 1963.

Dr. Harold R. Griffith,  
Medical Superintendent,  
Queen Elizabeth Hospital of Montreal,  
2100 Marlowe Ave.,  
Montreal.

Dear Dr. Griffith,

Although we have reprints of several of your articles on "curare" in our reprint collection, we do not have one of the original article:

Griffith, H.R. and Johnson, G.E. The use of curare in general anesthesia. Anesthesiology, 1942, 3, 418-20.

Should you have one or two left to donate to the Medical Library, we'd be delighted. We use reprints for loaning purposes very often as this saves the borrower the expense of a photostat, or the cost of mailing the bound volume. Aside from this however, a reprint of this article would be historically a most valuable addition to the library, particularly if you would sign it for us?

Sincerely yours,

Margaret Bickley,  
Assistant Librarian.
