31.XII.02 Constant Spec – Mrs. brought this year.

31.xii. 13 ...in a couple of weeks you will have a lecture* I gave at Barts at the request of some of the men interested in the new London Uni-versity scheme. There are two sides to this whole-time question. What I dread more than anything is the separation of the leading physicians an surgeons from the rank and file of the profession, as much of a separ-ation, for instance, as is gradually taking place between the professiona anatomists and physiologists & the average general practitioner. Then, as you say, why should the hospital exploit your brains and hands for cash That side of the question would not exist here, where private patients do not come to the general hospitals.

* ("The Medical Clinic", B. M. J., 1914, i, 10-16 (collected reprints (no. 303.)

25.xi.14. I randic Lidthis pamphlegin (for Brooks?' also frowns like re brain surgeons).

4.iii.15. I am sorry they are worrying you over that whole-time business. Gracious Heavens! I should think they must be satisfied with the rest of the work of you are doing and with the example you have been to the other surgeons of the country.

22.xii.15 (Fire) 'Vernon Plague is the only serious loss

31.i.18 G.R.O. to H.C. Think of Lord Inver[Aug.1913] and the hotty people we were then. Jack [McCrae] got turned down then by Nona [Guppy] & I always hoped she would relent and I believe [she] would have — but I do not think she really loved him.

2. Nona subsequently
