Best Books.

JUNE 7th 1925.

The classification of Best Books saves the trouble of classifying for yourselves.

A list of the Principal Books of the Month selected, catalogued, annotated, and classified by Arthur J. Hawkes, Borough Librarian of Wigan. The entries correspond in size to the standard catalogue cards and may be cut out and used. Special efforts have been made to supply the full names of all authors. The classification adopted is the Dewey Decimal System with occasional deviations. An asterisk denotes an extension number according to schemes that have been published from time to time in the "Librarian" by Mr. Hawkes. In Literature (800) *and History* (900) *the first number given is in all cases according to the revised scheme published in the "Librarian,"* 1911.
