BLACKER

33 Brunswick Square

11 March 1870

My dear Rupert Jones

I should be glad to know if I may count upon your help in the Physical Geography examination for the Science & Art Department this May. The number of ~~papers~~ answers will probably be much greater than last year and the number of applicants perhaps increased. Unless you can spare time to complete the work very rapidly it will hardly be worth while to attempt it as we are more & more strictly tied every year.

If you are able I should be much obliged if you would send me say 20 or 30 questions of various kinds

in the subject selected from various
Departments & not confined to my book.
There I should have during next week
as my papers must be sent in before
the end of the month & as should
meet before they are finally prepared

Yours always

D S Ansted.

Geol Soc

I have seen Mr Lord a few days ago & he will write for us

BLACKER

8 Duke St
Friday 18[illegible]

My dear Dallas

will you let the gentleman bring this case a copy of the proceedings that contains the whole of my paper on the Kalamaki Solfatara.

If you cannot spare it send him me for a few days

Yours always
D. Forbes
