Dr. Casey Wood,
Stanford University,
California, U.S.A.

My dear Sir,

Your letter of Feb. 24 was received telling me that Professor Slonaker had informed you of my interest in the vision of vertebrates and that you would be glad to let me have a copy of your paper "Fundus Oculi of Birds" which you published some years ago. Your paper should contain the information I am looking for at the present time and which I have not been successful in obtaining. I would be very pleased indeed to have a copy of this paper and must thank you now for your kind offer. It was very thoughtful of Professor Slonaker to mention my problem to you. Next time you see him tell him please that I appreciate very much his interest in my work.

Very sincerely yours,

Frank W. Bailey
