Dear Dr. Baird:

In reply to yours of Feb 23rd 60th my S. O. O. and the Am. Encyclopedia of Oph. are out of print and I have rarely seen a copy of either advertized in second-hand book dealers catalogues.

Since I retired from practice - after my Army service - I have found little use for my own library copy. It has been ~~and presently a decided~~ a good deal used, ~~shard~~ shows degree of wear, but if you will accept it I shall be glad to pass it on to one who will ~~make~~

look into it now & then.
~~use of it~~. Indeed I take the liberty of
sending it you by book post, and have
left on the volumes the old paper covers for protection
by the way.

I count among my good friends many
New Zealanders and it is a pleasure
to make this trifling return for more
than one courtesy extended to my wife
& myself when we visited your delightful
Islands a few years ago.

Believe me

Sincerely yours

Casey A. Wood

Dear Dr Wood. I was very much taken with a volume of your book Ophthalmic Operations lent me by Sir A. Lindo Ferguson of Dunedin. I ordered it about a year ago but found it was out of print. I then wrote a New York firm whose name I forget to try and get me a second hand copy. This attempt was a failure also. The firm suggested the American Encyclopedia of Ophthalmology but the price is prohibitive. Thinking it possible you may know where a copy of Ophthalmic Operations can be procured I am writing you.

Yours very truly
W S Baird

21 MAY 1928

Dear Dr Wood: I have to thank you very sincerely for your letter of March 29th and for the two volumes which arrived safely a few days ago. and have already been scanned over.

They will be of the greatest possible use to me and to my son who is returning to N.Z. shortly, after 4 years special work in England Ending with a trip to India lasting 4 months during which he did 1300 Cataracts and 600 other eye operations. I note that you are interested in birds and hope your interest extends to plants also, as I am posting you the seeds of some of our N.Z. shrubs & trees which I hope will grow and adorn the grounds of your own house or of the Stanford University.

If I can do anything further in the same way I shall be delighted.

Thanking you again

I remain
Yours very sincerely
W S Baird

Dear Dr Wood. I have to thank you for your letter of 27.7.28. and for the accompanying pamphlets. Should I ever manage a trip to California it will be a great pleasure to visit you.

I hope the seeds of N.Z. trees will grow. I know your climate is well adapted to them.

I planted some here but they have not shewn up as yet.

Your books are a great help to me and will be passed on to my son in a few years.

Yours very Sincerely

W.S. Baird

Dr Casey Wood.
Stanford University

Dear Dr Wood.

I have to thank you for the book (Vertebrate Zoology) that you recently sent me.

I have presented it to our local museum to which it is likely to prove useful.

It may interest you to know that a Moa's egg has recently been discovered near here. There are I believe very few specimens in existence ten or 12.

Yours very truly

W. S. Baird
