31 Aug 1925

Dear Mr. Navas:

That article with descrip. of Mantispa floridana was printed years ago and I no longer have copies. I have copied the descrip. and enclose it herewith.

Have you duplicate specimens of any of your species that you would care to sell? I would particularly like to get Myrmeleonidae and Ascalaphidae for the collection.

I have little time for descriptive work myself now.

Sincerely Yours

Nathan Banks.

Dear Sir:

I am sending you, under another cover, copies of some recent papers on Neuroptera, and would be pleased to receive some of yours; Algunos Neurópteros de Espagna nuevos. 1903. and a paper on Spanish species of Sisar. I should also like to obtain Spanish Neuroptera from you by exchange; I have a small coll. of European species, but almost anything would be of interest to me. I can send you species in all families, but I am more interested in the true Neuroptera, and in Perlidae.

Please notice my change of address

Sincerely Yours

Nathan Banks,

18 Nov. 1904.

My dear Sir:-

I am sending you, by registered mail, a package with a few American Neuroptera. I hope they will reach you safely, and that you will find time to send me some of your Spanish species, for which I shall be very grateful. At this moment I am preparing a revision of the Hemerobiidae of the United States, dividing the old genus Hemerobius into three genera. I think the classification will also suit the European forms; I will forward you a copy as soon as printed.

With best wishes,

Sincerely Yours,

Nathan Banks.
