Burns. Dec 1/31

F. L. BURNS

BERWYN, PENNSYLVANIA

11/1/31

Dr. Casey A. Wood,
London.

My dear Sir: My thanks for a copy of your useful Introduction to the Literature of Vertebrate Zoology. It has already proved its value to me. I think I may have something to offer by way of exchange and will visit the Librarian of McGill University. You will pardon my comments: On page 68 you state that in 1849 there appeared the first and only part of John K. Townsend's Ornithology of the United States. I wonder if you have seen this publication of the above date? Dr. Coues quoted, at second hand, the editions of 1839 and 1849, in the form of a prospectus. I have examined the former (1839) in the library of the Academy of Natural Sciences of Philadelphia.

You are of course correct in the date (1909) of the publication of "Bird-Lore," the 1904 in my Bibliography was a typographical mistake; [illegible] re. "The Ornithologist," Swan Bluffs, Wis., you state that Fox notes that No. 6 was not issued, so that there was in reality only six numbers published. However, Mr. Fox was in error, I have No. 6, Nov., 1886, pp. 41-48, and all seven numbers in my files.

Yours truly
F. L. Burns

Casey A. Wood Collection

Outside letter.

Berwyn, Pa., May 19, 1922.

Dr. Casey Wood,

Ans. ~~May~~ June 3. 22 Send complete sets to Mr Gill & keep Y.O. & O. until I send a list of wants next October

No. 7 West Madison st., Chicago.

My dear Sir: Pardon my delay in the matter of the periodicals. This is my busy time and I have little leasure for anything outside my occupation. I have at last brought together most of the papers you wish from me, but I find that my duplicate file of the Young Oologist and the Oologist, volumes 1-20, incomplete and the earlier volumes have the covers removed. The missing numbers are as follows: vol. 5:6; 6:4; 7:1 and 5; 13:5-12; 15:12; 17:2, 8, 10-12; 19:12; 20:3-12. Perhaps I have the missing numbers, but I fear they cannot be found at present.

I will hold the lot of papers and my Ornithology of Chester County, until you write me your wish in respect to the Oologist. I am much interested in your account of your trips in Spanish America.

Yours truly

S. N. Burns
