that my father relied on his assistance. Perhaps too I may fairly assume that you would be willing to give your invaluable aid in directing Mr Sherborn who would relieve you of the more severe portions of the work.

Of course the matter must rest for the present, until I get an answer to

BLACKER

Eton College.
Windsor.

Dear Prof. Rupert Jones

Can you tell me anything about Mr Ch. D. Sherborn?

He has written to me at my brother's instigation to offer to help in working out Eozoon; & says

my last letter to Sir Wm Dawson, who asked me to take it up myself. This I declined for many reasons, & made a counter proposal which may or may not come to anything.

Believe me
Yrs very truly
P. Herbert Carpenter

(Son of W B Carpenter FRS Micro-scopical Authority on the Foraminifera)

he has been with you for two years. If you think such a course advisable, I think we could not do better than put the matter into his hands as Zoologist, Prof Bonney tells me that he will be most glad to give any help re Mineralogy; & I know
