Dear Sir,

Many thanks for the B.A. Reports, which I have read with much interest.

Having compiled indexes to all Herbert Spencer's works, & also Cayley's Collected Math. works, I can sympathize with your labour in a very practical way.

I regret to learn that you can do but a couple of hours work a day, drawing the inference that you have not good health. Mine is wretched now, & compels me to live here — I have not been in London for 8 years! The place I like of all others. I wish I could help you.

Yours sincerely

F. Howard Collins.

I wonder whether you are any relation of the one of your names who put my book-plate: he certainly lived geographically near you.
