Dear friend

C. DAVIES SHERBORN
DONAVIT.

Belfast. 29/95.

Accept my hearty thanks for the Copy of thy book, which has duly arrived, & will prove of great value. What an amount of searching it must have cost thee to get it together! We have been so much upset with painters & paperhangers all through the house that I have not been able to touch my microscope since thou wast here — & have scarcely had room to write a letter; — this & my dear wife being very ill must be my excuse for not writing thee. And yet only partly so, for I intended to have done thee a drawing direct from the objects, & hence delayed, but have now made a copy of the drawings which I showed thee not being able to compass the other. I enclose said sketch of N/sp Nodosaria & Bulimina, each of which fairly shows the peculiarity of the respective shells. Of the Bulimina I have several specimens of which I will be glad to send thee a sample if of any service to thee. I regret I cannot offer same of the Nod. excavata, having only one.

Again thanking thee for the Book

I remain Thy Sincere friend

Chas. Elcock.
