Dear Dr Willey,

I enclose herewith for your acceptance two copies of a paper which I have recently contributed to the P.Z.S on Kelaart's nudibranchs & others. In it I have reproduced some of Kelaart's unpublished drawings hoping that some one may be stimulated

to compare them with the
living animals - If anyone
will try to do this I
think the necessary mate-
rials will be found in
this paper in Kelaart's
original articles, which
are no doubt accessible
in Ceylon - should you
know of anyone likely to
take an interest in the
matter I should be much
obliged if you would put
the paper into his hands
& I shall be delighted to
examine any material that
may be sent me - what I
want are specimens with
a statement that their
external characters appear
to be those of such & such
of Kelaart's species.

I was very sorry not
to see you when I passed
through Ceylon last sum-
mer & hope that your
health is better now.

Yours sincerely
C Elliot.
