Ridgway Collection

Richmond Road
near Chardon Road
South Euclid Ohio

August 23 1909

My dear Mr. Ridgway

I dont know what you thought of me in not sending the address that you asked for but you might find Parts II III IV of your Birds with the Middle America as Mexico longer & more time - But duties determined by illness and many other hindrances - till now at this late date & year they may be lost & lost. Would

however give you her present address in case you still have them and would be kind enough to send them;

Mrs. Vivian Maynard Mook
1837 East 101st Street
Cleveland Ohio. She is as much interested in birds as ever her marriage - a year since - and residing near the edge of one of our largest parks - spends much time in studying them.

Here I am after there is a wild wooded ravine close by where so many birds come and many like it the trees about the doors as there is no call to entirely clear and my older daughter Maude says we have whippoorwills here. The Great Horned Owl hoot on us nights and at eve we hear Bluffton Wills and Cedar may days come in flocks. It is remote in this respect although only four miles from where I live. Enroll you last in E. Cleveland.

You were not at all well when you wrote last but trust you are improved and are quite well now.

It was really a great pleasure to hear from you again after so many years.

Sincerely
Pauline Thurlow Farley
