BLACKER

Copenhagen 5 Mai 1859.

My dear Sir

On the paper which You will find in my little book You will find the required drawing of Calcarina Spenglere from the quoted Volume of the Danske Videnskabernes Skr. nye Samling. I should have send You the whole volume if we had a single copy of it, but it has been outsold many years ago. All the drawings are however compleatly correct. I join the drawing of some other Foraminifera which Spengler has described in the same Volume with a note on the page where You will find the description. It may perhaps be of some use for Your work.

I take the liberty to send You a pamphlet on some geological-geographical observations on Denmark, and beg You kindly to forward the enclosed books to their destination.

Believe me
dear Sir
Your sincere
H. Reinhardt

Vol. 12

Wm. K. Jones
Assistant secretary
to the geological society

I find an opportunity of sending the drawings and pamphlets by my friend Mr. Caldwing head-ingeneer of the Public Gas- Water and Sewer Works at Copenhagen whose aquaintance it certainly will interest You to make

Very truly

Yours

Geo Forchhammer
