Mr. William A. Ridgeway,
Smithsonian Institute,
Washington, D. C.

My dear Mr. Ridgeway,

Will it be possible to secure certain colors given in your color manual separate from the book itself? We have under way here investigations dealing with changes in the color of shanks and beak of the domestic fowl, and we wish to introduce these changes in terms of certain colors given in your manual, and on this account wish to secure separate copis of these colors for use in making a chart to use in the field.

Trusting to receive an early reply, I am

Very truly yours,

H D Goodale
