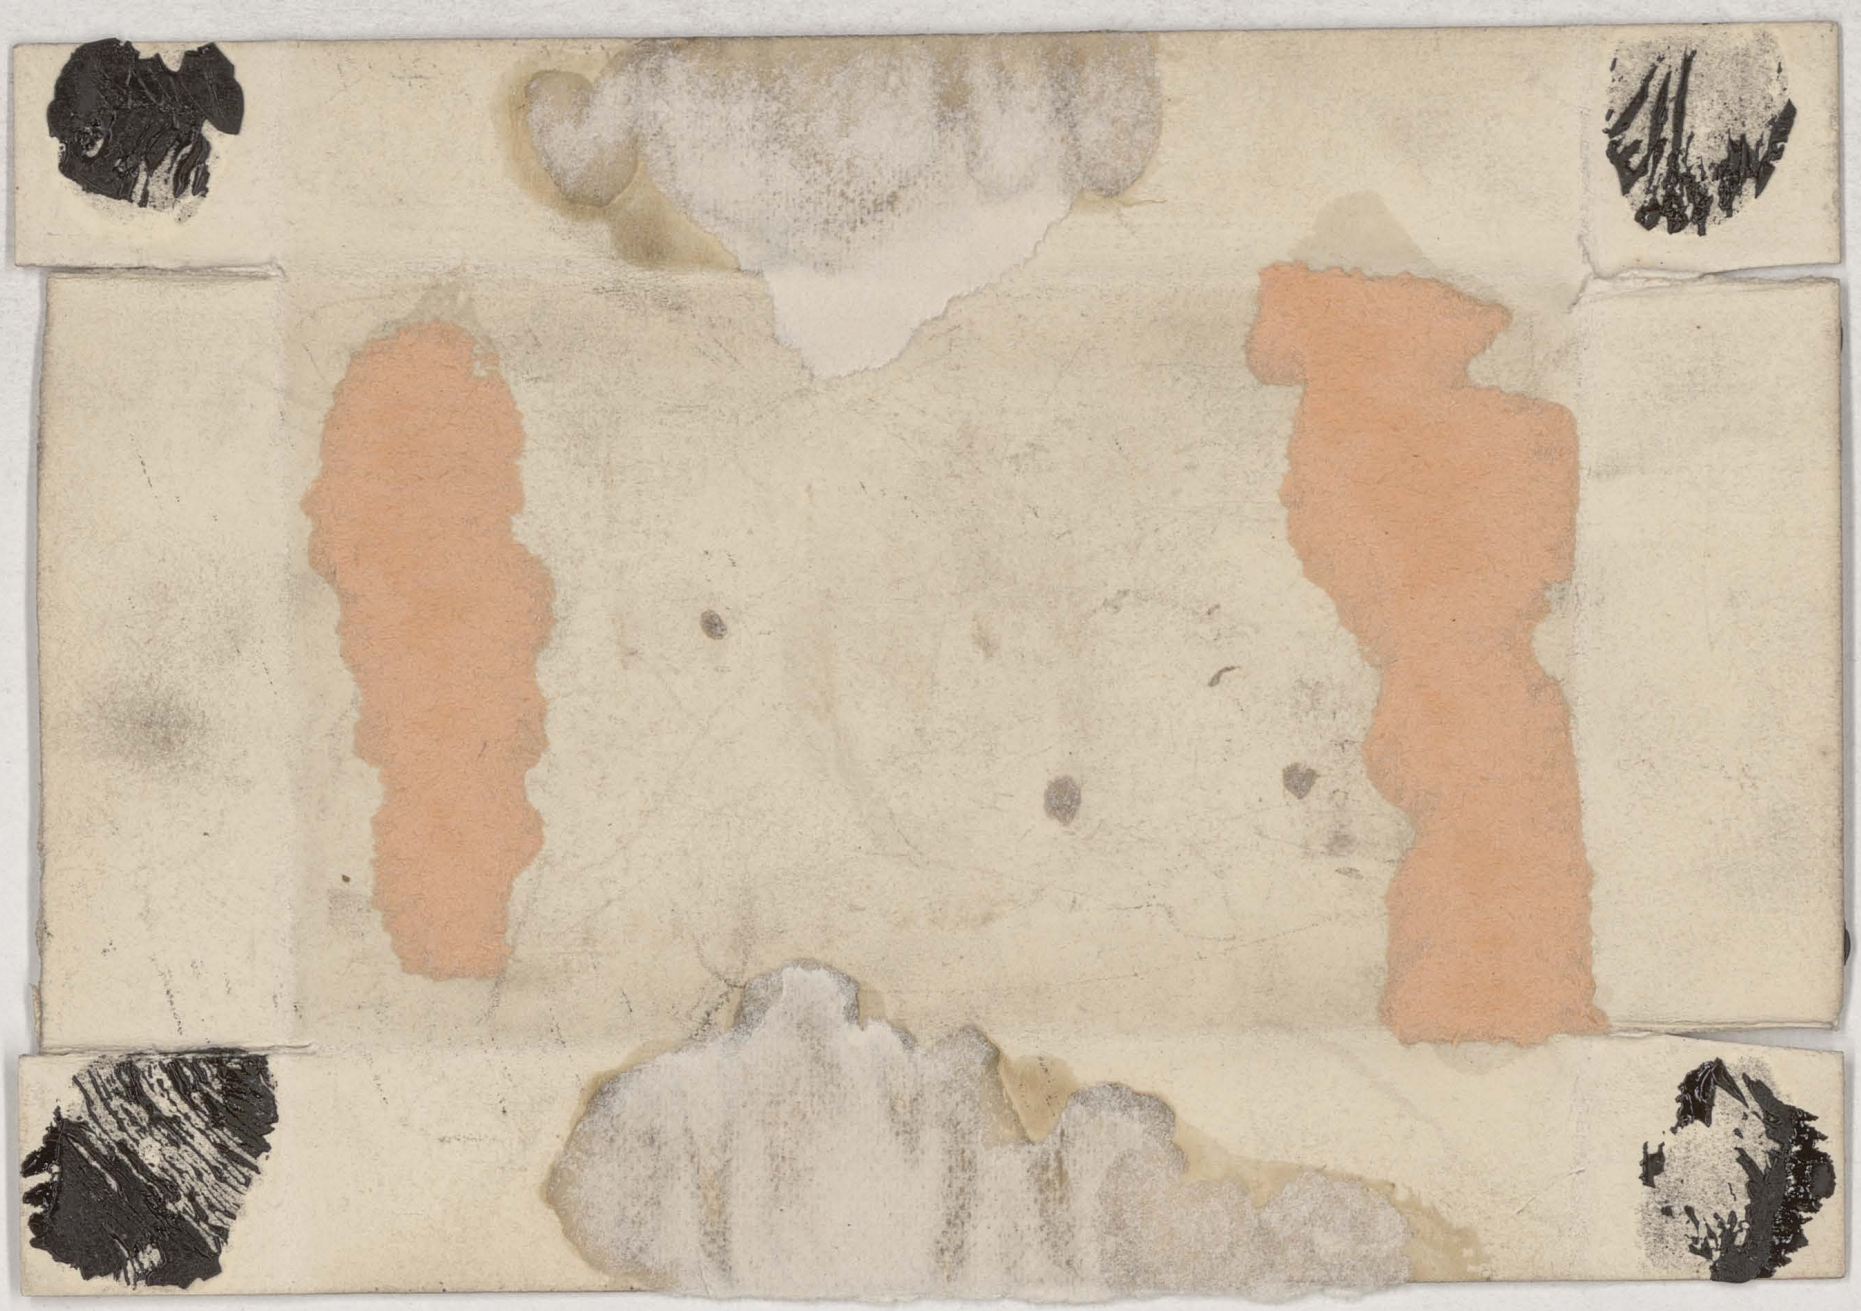
at nine o'Clock.

Regents Park,
opposite St Johns Chapel.

G. B. Greenough



BLACKER

Dear Sir

I have received a letter from Mr. de la Beche approving the alterations I made in his paper on Nice but protesting in toto against those made by Dr. Buckland - & desiring to be informed what he had better do with the paper under these circumstances. - pray let me know your wishes upon this subject.

Dr. Buckland sent me his Appendix a few days since conceiving that the Council would wish that also to be referred to me but I declined taking it in hand till I had learned de la Beches sentiments & intentions in regard to the original paper -

Mr. de la Beche also enquires anxiously after his communication on the neighbourhood of Torbay & wishes to have a fair answer lost or not lost? if it is safe, as I believe it is, have the goodness to tell me so and likewise what it is intended to do with it.

The widently feels sore & requires to be appeased.
I had two papers, he says, for the Society this
year on parts of Italy but really with one paper
lost & another burnt nearly published with
opinions that do not belong to me I begin to
look shy notwithstanding my old attachment
to the Geological Society which some how or
other they dont seem to like.

I remain

Dear Sir

Yours very faithfully

G B. Greenough
