November 5, 1917.

Mr. Casey A. Wood,

Chicago, Ill.

My dear Dr. Wood:

On returning from a sojourn of eight months in California I found a complimentary copy of your beautiful volume on the "Fundus Oculi of Birds" awaiting me. I have delayed my acknowledgment until I had time to read it. I have just finished this pleasant undertaking and have found the work an extremely interesting one. Please accept my sincere thanks. I was particularly interested in the multiple foveae found in some birds.

While in California I had the pleasure of meeting Mr. and Mrs. Shafer at a mountain ranch resort and I think Mrs. Shafer told me that she was your sister. Please give them the cordial greetings of Mrs. Guyer and myself when next you write them.

Again thanking you, I remain,

Sincerely yours,

M. St. Guyer.
