BLACKER

Vienna 10th June 1862

My Dear Sir

Our most excellent friend Prof. Suess has now left Vienna on the 7th and will very soon join you and be personal witness of your great achievements in all branches of human occupations. Before leaving he desired me, whenever I should write to him to do so under your amiable care. So I at once take advantage of his communication and beg you will kindly hand over to him the letter sent off at the same time with the present one.

Many of our German

Military Border, Franz v. Hauer and Dr Stache, accompanied by a volunteer Friend Dr Fittel in Dalmatia. Poor Bergrath Hauer lost also his second amiable young wife, only 30 years old in consumption, on the 17th of may! Foetterle will leave Vienna in about a week also for the Croatian Milit. Border. He is still most busy with the arrangement of our collection of fossil fuel, similar to that we sent to the Exhibition

Ever most truly

Yours

W Haidinger

Minerdyn

friends now profit of the opportunities afforded them, to get some peeps at so many interesting subject. As to myself I should find immense sources of Knowledge, of Kindness, of hospitality even without the Grand International Exhibition, but in my age and state of health I have only to forbear forming an idea of such an undertaking. Mine has been the time from 1823 to 1827, and though I might have still better made use of that precious time, yet it really forms the ground work, the basis of my later scientific endeavours. I may with much truth call Britain my second home! So to revisit it, would have been a great treat indeed. As it is I must hear the reports of my friends.

Our excellent friend Count Marschall always communicates to me your kind notices, which are very welcome indeed.

A very few days ago I received from kind Mr. Poulett Scrope his great work on Volcanos, a life suspended in serious study.

Our geologists are now all in the field, Lipold, Wolf, Baron Andrian, Paul in Bohemia, Stur and Stoliczka in the Croatian
