Dear Sir I received your papers some time ago, for which I thank you, I have written them out, and some time intend to type them, in the form of a book, they are very interesting reading. The week before last Sir Maynard Hadstrom was over here from Fiji, I tried to see him but could not find him after he had left the Biltmore Hotel, I also have an uncle in Fiji, that used to be connected with the firm of Morris, Hadstrom Ltd he has been in Fiji for about twenty years, he spent most of his time in Lavuka.

I wrote to Dr. Belcher, but have not

receive any reply yet, I was thinking of going to Fiji for birds to bring back here for sale also the Museum here wants me to collect some specimens for them at the same time.

I am returning your papers under separate cover, I had my boy make a folder for your papers, at the high school he goes to, I am sending you that in return for letting me have the use of the information contained in your papers!

Again thanking you

I am yours truly

Birds of Fiji —

Dear Sir

Your letter and books received some time ago for which I thank you very much.
I have written to Mr. Belcher, as you advised, I also mentioned your name.
In regards books on the ornithology of the South Seas I have been to the library here, and they do not have anything on that part of the world at all.
I also wrote to the Field Museum, and they said the only book they know of that has ever been published on that subject, is. Ornithologie der Viti, Samoa, und Tonga Inseln by Otto Finsch & Gustav Hartlaub Germany 1867.
Thanking you for the trouble you went to in sending me your two books which are very interesting

Yours truly

R Hodgkins
