Dr. Casey Wood
California Institute of Technology
Pasadena, California

Dear Dr. Wood:

I am writing the McGill Librarian to determine what numbers if any of COPEIA are missing in his set. The Library is already on the current subscription list. If any numbers are missing, we will let you have the list, with quotation of price.

Sincerely yours,

Carl L. Hubbs.

Editor,
Librarian, McGill University,
Montreal, Canada.

Dear Sir:

It is with profound pleasure and gratitude that I, and my colleagues, received copies of the magnificent "Introduction to the Literature of Vertebrate Zoology". I have withheld my thanks until I could review this work for COPEIA, the journal of the American Society of Ichthyologists and Herpetologists. Dr. Wood is to be very sincerely congratulated, not only for compiling with such ardor this great work, but for the part he has obviously played in building up the rich library behind it.

A copy of this letter goes to Dr. Wood. Copies of my review are enclosed in the letters to you and to Dr. Wood.

Of course I shall pick out and send to your library a number of my publications, and keep the McGill Library in my mailing file.

Sincerely yours,

Carl L. Hubbs,
Editor.

Mr. Casey A. Wood,
California Institute of Technology,
Pasadena, California.

Dear Dr. Wood:

I was rather surprised to hear from you from southern California. I only wish I could be there too—which is by the way back home for me.

We take pleasure in sending you a copy of Copeia 1932 (1) containing the brief review of your magnificent volume on the literature of vertebrate zoology. Within a few days we will forward also a number of reprints of the review section from this number, to you, to the publishers and to McGill.

It would be a distinct pleasure for me to ask that your name be included on the membership roll of our Society, should you be interested in joining with us and receiving the journal regularly.

Sincerely yours,

Carl L. Hubbs,
Editor.

27 April 1932.

Dr. Carl L. Hubbs,
University Museum,
Ann Arbor, Michigan.

Dear Dr. Hubbs:

Many thanks for your flattering review of my INTRODUCTION. I am pleased to know that I have said something worth while on the literary aspects of ichthyology and herpetology.

If and when you visit the Pacific Coast do not fail to look me up. I arrived here from England last November and am doing a little work in the scientific institutions of this quarter of the world.

Very sincerely yours,

Casey A. Wood

CW:DB

P. S. If not too much trouble will you send me a copy of COPEIA containing the review just mentioned. I have not access to the McGill copy of your well-known journal.
