BLACKER

Wentworth House
Church Street
Stoke Newington N.
Feb. 7th 1874.

My dear Prof. Rupt. Jones,

I have just left Brighton permanently bringing my goods & chattels with me & the address here given. ..
Some Specimens (Mrs Thompsons Public from South Africa) I do not present in a "Pinched up" condition with my other collection, but immediately I get straight & I hope I in the course

W. Saville Kent
Naturalist

Has great work is
History of Infusoria
3 Vols
& Zoology
of Australia
& The Great
Barrier Reef
of Australia

W. Saville Kent.

P.S. I suppose you received my letter explaining the circumstances which determined me upon resigning my appointment at Brighton. It was an unfortunate piece of business, but scarcely allowed any other step was open to me considering the auspices under which I entered upon that letter.

If you would have come across any particularly interesting ventriculite I should return a look at them & send you a cast of them. I am just working up a Paper on the subject.

of a few days, I will send it to you — a Copy at the Post. Soc. You have no doubt seen in the "Nation" that I shall possibly be going to New York this very long. It is not however to be this Spring has still advanced so far as that — & to keeping long to go so far —

Yours very sincerely

W. Saville Kent.

Rev. T. Prosser James

P.S. I suppose you received my letter explaining the circumstances which determined me upon resigning my appointment at Brighton — It was an unfortunate piece of business, but scarcely allowed any other step was open to me considering the auspices under which I entered upon that latter —

If you should hear any particulars concerning Ventriculites I should esteem a favor if you would look at them & send them as I am just working up a paper on the subject.
