McGill University,
Montreal, P. Q.

Mr. G. R. Lomer, Librarian:

Dear Sir:-

Replying to your postal card of 26th ult., I regret having to inform you that up to the present time, there have been no title pages nor indices published for the GULL. A member has in course of preparation a card index of the more important articles in vols. 1-5 and to date, and if these data can be compressed into convenient space, we shall probably print such an index in the near future, and it would of course come to you in the regular order.

Hoping that this may serve your purpose, I am

Yours very truly,

A. S. Kibbe

President.

January 7, 1923.

Dr. Casey A. Wood,
Coronado Beach, Calif.

My dear Dr. Wood:-

Your letter of 1st inst. has reached me and I desire to express my deep regret that Mrs. Wood has been called upon to suffer so greatly. Having experienced something of the sort in our own family, we can appreciate what it means and can sympathize most keenly with the sufferer.

We shall all think of you often while you are in the antipodes; shall envy you just a little, and shall look forward to enjoying your account of your experiences, when you return once more.

I have used your San Diego letter as propagandum among our members and their friends. I cannot bubble freely over the prospect of tourists in our midst, but I do feel grateful for any presentation which may be instrumental in fomenting intelligent consideration of the inter-relations of birds and men.

Wishing you God-speed, a happy and successful voyage and a safe return, I remain,

Very sincerely yours,

A. S. Kibbe

FOR THE STUDY AND THE PROTECTION OF BIRDS

ans. Jan. 1. 1923

1534 Grove St.,
Berkeley, Calif.,
December 27, 1922.

Dr. Casey Wood,
Hotel del Coronado,
Coronado Beach, Calif.

My dear Dr. Wood:-

I have duly received the clipping from the San Diego Union which you were so kind as to send me. Your plea is only too well justified, but not the least admirable feature of your letter is the keen appraisement of the California psychology, and this argument alone should carry the thought home to the commercially inclined mind. I thank you for remembering me in this connection.

I am also much pleased to learn of your presence in the state and am emboldened to remind you of your letter from Barbados, in which you intimated that we might hope to have the pleasure of hearing you at one of our meetings. Dr. Grinnell was under the impression that you had gone, or were going, to Chicago, but that you would return soon and would come to San Francisco.

Writing not only on behalf of the Audubon Association of the Pacific, I am likewise commissioned on behalf of the Cooper Club to invite you to address a combined meeting of the two societies, at such time as may best subserve your convenience. In this way we can assure you of a fairly representative "bird audience", although the Audubonites would not lay claim to more than a speaking acquaintance with the upper strata of ornithology. Your letter from Kartabo afforded a great deal of pleasure and information and you may rest assured of a most cordial welcome.

The regular programmes for the second and fourth Thursdays of January have been developed, but like days in February or thereafter are open, or a special date intermediate could be arranged. The Cooper Club meets in Berkeley on the fourth Thursday and the Audubon in the San Francisco Public Library on the second Thursday.

Extending the Compliments of the Season and looking forward to your reply, I beg to remain,

Very sincerely yours,

A. S. Kibbe.

FOR THE STUDY AND THE PROTECTION OF BIRDS

Dec 2 Bulletins arrived.
ans. Dec. 21

1534 Grove St.,
Berkeley, Calif.
September 26, 1921.

Dr. Casey A. Wood,
United States Consulate,
Barbados, B.W.I.

My dear Dr. Wood:-

It affords me great pleasure to comply with the request made in your letter of September 11, from London, and I am mailing to you, addressed as above, a complete file of our Monthly Bulletin. Successive numbers will be mailed to Library of Ornithology, McGill University, Montreal, hereafter. There will be no charge, but we shall be happy to know that the University deems them worth preserving. Our field is rather narrow, and we have no aspirations outside thereof. We are working upon the rising generation through the agency of the school teachers, who contribute the bulk of our active participants at meetings and field trips.

I have no wish to embarass you, but if you cared to write us a letter dealing in a general way with the birds of Barbados, I am sure our members would appreciate such a message.

I am, sir,

Very sincerely yours,

A. S. Kibbe.

President.
