East Rockport Cuyahoga Co. O. July 25th 1872.

Mr Ernest Ingersoll.

Dear Sir.

A severe personal injury has rendered it impossible for me to respond, at an earlier period, to your communication of the 10th of June.

I have not, myself, meet with the Chesnut Sided Warbler, breeding in Northern Ohio, but having, on several occasions seen specimens of this species, in a swamp, in this vicinity, at mid Summer, I have classed it among our Summer Residens.

The Correctness of this Conclusion has been confirmed by the finding, its nest, here, by Mr Rufus Winslow of Cleveland. —

I have no evidence that the Canada Jay ever visits these parts.

Very truly Yours
J. P. Kirtland

Ornithologist (Ohio) died about 1886
