December 9th 1931.

Dear Mr. Mousley,

Very many thanks indeed for the most handsome volume on the Literature of Vertebrate Zoology. You may be sure that I treasure it as one of my most prized possessions. What a work!

I am sailing for your side on the 30th of this month and hope things are not so bad with you as we hear they are. I don't know if I shall get to Canada this time and rather imagine I shall not. If not, I shall hope to see you again in the following season. Did you see a letter from

Jack Miner in one of your papers ? And my reply ? He sounds like a rather sentimental gentleman !

Well, I must be moving. My kindest regards and all good wishes for Christmas and the New Year.

Sincerely yours,

Charles. W. Knight
