Bowdler Sharpe Collection

Stuttgart 19. March 1883.

Dear Sir,

On the 25. Oct. 1882 I have sent you for your writing of the Malurinae from the collection of the Kön. Naturalien Cabinet at Stuttgart

10 Species of Drymoeca in 12 stuffed Specimens
2 " " unknown for us, to name them.

I suppose you may have done the descriptions of these birds in the last 5 months and should be very glad, if you could return them now on the safest way.

Your very kind offer, to send us a present of some good skins of birds, we accept with the greatest pleasure and we shall be also very thankfull for the genera: Franklinia Bl., Hylocola Gld, Sphenura Licht. (except floccosa Gld) and principally for Sericornis Gld, Amytis Less., Chaetornis Gray and Hodgsonius Bp., which we have not in our collection.

Believe me, dear Sir, very truly Yours

Dr. F. Krauss.

Do you know any occasion, where we can buy good skins of birds &c.?

Please give me the name of the Author of Pyrgisoma occipitale and where it is published.
