on the great iron meteorite of Nordenskiöld, when a number of the Geological Magazine fell into my hands, just out, with an excellent list of these authorities in a note appended to an account of the work done on that meteorite by various scientific men: the account being written by Mr. Flight the chemical assistant in this department.

I enclose a brief note on the Greenland authorities, & am

Yours sincerely

Neil Story Maskelyne.

Nordenskiöld
Maskelyne

My dear Sir

I send you by ~~book~~ post as complete a list as we can furnish of all the localities that are obtainable from the Greenland minerals in the national collection.

Although we have the Collection of Sir Chas. Giesecke

(I believe his first collection,
that namely which was
bought by Mr. Alan in
Edinburgh out of a prize
vessel taken into Leith by
a war-ship) I regret to
say that none of the specimens
have Localities attached to
them.

Those in the list sent to
you are alphabetically

arranged and are mostly
from Heuland.

It is probable that he
obtained both the minerals
and the localities from
Sir Chas: Giesecke.

I have in vain sought
to identify many of these
names with those on
our maps.

I was making out for
you a list of authorities

have your valuable assistance as was to have been this year.

I am very much obliged to you for several bits of Communication one of which makes old Bosbury all the more interesting to me as describing the corresponding frontier fortress that protected the old Ridge way. Perhaps we should rather say the Ridgeway was the highroad through districts then well peopled & those fortresses were the refuges of the people rather than the

August 10.

Dear Rupert Jones

I telegraphed to you one day last week to say that our Archaeological meeting has been postponed and is to be resuscitated in identical form this time next year.

I have been very ready & I should have written instead of telegraphing to you.

Charles Smith the very

popular and indefatigable
Secretary had the misfortune
to see his wife brought in
insensible from a fall from
a pony carriage and she has
been suffering from concussion
of the brain. They are both
somewhat on in life and I
thought - as indeed there can
be no doubt - that he could

not possibly attend to the
multifarious preparations
as needed for the Archæological Meeting which
his wife was in so critical
a state. I therefore with
the concurrence of the
Committee postponed the
Meeting. I hope we
may have our old time
move worked up & interesting
next year and that we may
