

EDDY PAPER COMPANY LIMITED

and its wholly owned subsidiary THE E.B. EDDY COMPANY

PRESIDENT'S MESSAGE

Business conditions in Canada were more favourable in 1953 than had been anticipated in the early months of the year. Most segments of the economy enjoyed good demand and high volume. There was, however, a continuation of the trend of rising costs without adequate increases in selling prices resulting in lower profit margins.

The continued rise in wages, together with a high level of employment, has sustained purchasing power and demand, although the growth of industrial capacity in recent years has intensified competition in both domestic and export markets. There has been a definite return to a buyers' market, particularly as to quality discrimination, but generally a market in which there has been a continued strong urge to purchase goods.

Our volume increased substantially in 1953 and earnings before income taxes were slightly higher than in 1952. Higher costs arose mainly from increased wages and employee benefits, together with increasing customer demands for quality of product and service.

Again, depreciation, interest and other fixed charges have increased as expenditures are made in our mills to raise efficiency, improve quality and keep pace with the growth of the domestic market.

The coming year will see the completion of our new paper machine for the manufacture of tissue products. This new machine, the most modern of its type, will result in a great improvement in quality as well as a much more efficient manufacturing operation.

Net income for the year was \$862,161, or about 10% higher than last year, the increase being mainly due to a reduction in Federal income tax rates. During the year, Class "A" shareholders received the usual dividends totalling \$1.00 per share or an aggregate of \$200,000.

The year 1954 is faced with confidence. One of the major undertakings in 1954 will be filling increased capacity while dealing with a market progressively more demanding as to quality and service.

The competent group of men heading the various divisions are ever aware of their responsibilities to shareholders, employees, customers and to all the various communities in which the influence of the Company is felt.

To our established customers who have continued to support our efforts I, once more, extend sincere thanks.

I am most appreciative of the part played by each employee in the year's successful operation. Their achievements have been, and will continue to be, a significant contribution to the progress of your Company.

CV Laferton

PRESIDENT

R E V I E W O F T H E Y E A R

EARNINGS

In 1953, the fine and specialty paper and paperboard industry emerged from the difficult conditions of the previous year and demand was well maintained for all products. However, the year was one of keen competition in which quality of product and customer service were emphasized, while at the same time costs, particularly labour and employee benefits, continued to rise. Nevertheless, the Company's consolidated net earnings before income taxes were slightly higher than in 1952 and, after providing for taxes, consolidated net income amounted to \$862,161, as compared with \$782,184 earned in 1952. These figures do not include the earnings of our partly owned subsidiary, Sidney Roofing & Paper Company Limited, to which reference is made later in this report.

Total sales of all grades increased to 124,783 tons from 118,755 tons in 1952. Included in these figures were newsprint shipments of 48,353 tons in 1953. Other products increased by 8,088 tons to 76,430 tons. Exports other than newsprint amounted to 3,326 tons for the year, or 985 tons more than in 1952 but competition resulted in sharply reduced prices in foreign markets.

The rise in sales volume, together with substantial benefits realized from capital expenditures made in recent years, enabled the Company to maintain earnings in the face of narrowing margins resulting from higher costs. We have continued the policy of

writing off the full depreciation allowed for income tax purposes, including depreciation on the cost of projects still under construction.

TAXES

While some relief in income tax rates occurred in 1953, the Federal and Provincial Governments still took almost half of our earnings. Moreover, total taxes of all kinds payable to Municipal, Provincial and Federal authorities, exclusive of stumpage dues and ground rents paid on our woods operations, amounted to more than \$2,000,000, about \$2.40 for each \$1.00 of net income.

RETAINED INCOME

Since the inception of the Company in 1946, all earnings, less dividends on Class "A" shares, have been retained and used in the business. This retained income amounted to \$4,908,537 at December 31, 1953.

The amount retained from 1953 earnings amounted to \$638,161, representing the net income of \$862,161, less dividends of \$200,000 on Class "A" shares and discount of \$24,000 on the issue of \$800,000 of Series "C" Bonds.

PROPERTIES

The year 1953 saw the completion of some large projects for the modernization and expansion of existing mill facilities.

In addition, the new tissue machine project was well under way at the year-end and it is anticipated that this machine will begin producing in the last half of 1954. This is a major project and an essential one from a quality and volume standpoint if we are to maintain our dominant position in the tissue product market.

Total capital expenditures in 1953 amounted to \$3,203,536, of which \$2,977,250 was devoted to the mills in Hull and Ottawa. The remaining \$226,286

comprises mainly equipment, roads and other facilities used in Woodlands operations. Capital expenditures planned for 1954 amount to some \$4,800,000, of which \$4,250,000 is to be spent on projects under way at the end of 1953.

BONDS

The last of the Series "C" Bond issue amounting to \$800,000 was delivered on March 16, 1953. The net proceeds, \$776,000, together with the \$234,648 held by the Trustee for the bondholders at December 31, 1952, were withdrawn from time to time as capital expenditures were made during the year.

Total bonded debt at the end of 1953 amounted to \$9,467,500. The increase of \$276,000 during the year comprises the \$800,000 Series "C" Bonds delivered, less total sinking fund redemptions for all issues amounting to \$524,000, including \$93,000 redeemed in 1953 on account of the 1954 sinking fund instalment. Provision has been made in the accounts for the remaining sinking fund payments due in 1954, amounting to \$476,000.

WORKING CAPITAL

Working capital amounted to \$7,133,984 at December 31, 1953, a reduction of \$110,106 during the year, which partially reflects the heavy capital expenditures already mentioned. The bank loan, however, was reduced by \$481,000 to \$1,513,000 at the year-end.

SIDNEY ROOFING & PAPER COMPANY LIMITED

The 1953 consolidated earnings of this Company and its subsidiaries, before income taxes, were higher than in any previous year and well above 1952. After provision for income taxes, net profit for the year amounted to \$323,118, as compared with \$200,420 in 1952. Demand for all products

was strong throughout the year and shipments were substantially higher than in the previous year. The continuing building boom in Western Canada resulted in higher sales of building materials in all territories, the growth being particularly marked in the Prairies. The paperboard and paper box business recovered from the slack conditions experienced in 1952 and sales were greatly improved.

EMPLOYEES

Although no general increase in wages was granted during the year, the Company, together with the industry, instituted a reduction in working hours for mill employees from forty-eight to fortyfour hours per week, effective January 4, 1953, with no reduction in take-home pay. This reduction in the work week was the result of the 1952 labour negotiations. In addition, the 1953 negotiations resulted in a further reduction of the work week to forty hours, effective October 4, 1954, again maintaining take-home pay. Accordingly, hourly rates rose by 20% but only part of the increase was effective for the full year. Thus, while labour costs rose substantially in 1953, the increase will be still heavier in 1954 and the maintenance of present profit levels will depend upon the level of business and upon the improvements in operations anticipated from our programme of mill development and improvement.

During the year, the average working force engaged in manufacturing, sales and administrative capacities numbered 2,356 persons, exclusive of wage earners employed by ourselves and our logging contractors in woods operations. Apart from wages and salaries, the Company spent some \$1,135,000 on employee benefits including contributions to the retirement income plan and group insurance, Christmas bonuses, vacations and holidays with pay, plant medical services and recreational activities. This amounted to approximately \$482 per employee.

OF THE E.B. EDDY COMPANY

A measure of the acceptance of E. B. Eddy products is in the familiarity of their names. The house-wife will recognize many of the brands she buys from her grocer's shelves. Other Eddy brands will be familiar to the office worker as watermarks on business stationery. To printers and box manufacturers, publishers and converters, E. B. Eddy products are literally their stock in trade.

PRINTING PAPERS

Cheneaux Bond, Wellington Offset, Guardian Index Bristol, Tecumseh Bristol, Mohawk Bristol, Ancaster Book, Multiscrip and Multicopy Duplicating, and many others, all in a selection of sizes, weights and colors.

CONVERTING PAPERS

A wide range of papers are made for conversion into hundreds of everyday products, for example, envelopes, bread wrappers, paper cups, etc.

HOUSEHOLD PRODUCTS

Toilet Tissues—White Swan, Universal and Alouette. Serviettes—Silver Swan, Brocade and Linen Finish. Towels—Han-Dee and Onliwon.

GROCERY BAGS

For grocers, druggists and confectioners.

INDUSTRIAL PRODUCTS

Toilet Tissues—Onliwon and Roll Tissue.
Towels—Onliwon, Eureka, Apex and Premier.
Tray Cloths
Serviettes—Dispenser and Onliwon.

PAPERBOARD

A wide range of grades for manufacturing into paper cartons largely for use in the food processing industry.

NEWSPRINT

For the domestic and export markets.
