Preface

Possibly the most immediate measure of the quality and scope of a university is the excellence of its graduates and the spectrum of their work at the university. Such is particularly true for holders of advanced degrees. A Thesis Directory provides this kind of information at a glance, for it lists the names of those who have achieved senior degrees and through the titles of their theses it suggests the work they performed.

This revised edition of Volume II (1960-1973) is now offered publicly and with considerable pride. Listing some 1337 M.A.'s, 490 M.Eng.'s, 1874 M.Sc.'s, 1826 Ph.D.'s as well as some other degrees (a total of 5784 entries), it incorporates a number of revisions and additions which have been brought to the attention of the editors since the publication of the first edition. I think that many will find this book intrinsically interesting and browse through it, finding nuggets of valuable, or at least intriguing, information on every page.

Computer programming and printing have given us not only a handsome Directory but also a very flexible one; thus it was easy to include four auxiliary listings besides the main one. In addition, our computer tape can be read in many other ways as well, and we are willing to produce different listings from the basic information in response to special demand.

It is a pleasure to acknowledge our gratitude to the editors: Professor Frank Spitzer of the Department of Electrical Engineering and Mrs. Elizabeth Sylvester, McGill Reference Librarian, who have each brought their personal and professional skills to bear on this venture, quite apart from energetically pursuing it, and coordinating many assistants. It is also clear that without the conscientious help of Mrs. Florence Mitchell, Thesis Secretary, access to the data would have been infinitely harder. We are especially grateful to those who have drawn errors or omissions to our attention.

This book covers the period 1960 to 1973. A volume of similar bulk for the years 1881 (when it all started) to 1959 was published in 1976. A third volume covering 1974-1979 is planned for publication in 1980.

Introduction to Volume II McGill University Thesis Directory

This volume covers the years 1960 to 1973 while Volume I includes years 1881 to 1959. The format of both volumes is similar.

These volumes show the names of authors, titles of their thesis, names of their departments and their thesis supervisors, together with other details. A number of indices are attached.

Although much care has gone into the preparation of this material, some errors may have persisted. Readers are invited to send suggestions for improvements or criticisms of the current publication to:

The Thesis Office
Faculty of Graduate Studies and Research
Dawson Hall
853 Sherbrooke Street West
Montreal, Quebec H3A 2T5

For the benefit of those interested in research in particular areas, all the material is kept in a computerized data base. This and the existence of suitable application programs enable us to supply on request listings of theses selected by "specific keywords from the thesis title," "specific departments or programs" or "specific supervisors".

Presentation of Data

The Annual Listing, the first section of this volume, contains in strict numerical order, corresponding approximately to alphabetical order, the theses accepted by the University each year, broken down by convocation and degree. A sample entry is given below:-

72-047 **MacLeod, Stuart M.** (Toronto) Ph.D.: "Hepatic microsomal drug oxidation and electron transport in immature rats, rabbits, and humans." (Pharmacology & Therapeutics: Eade, N.)

The first two digits indicate the calendar year in which the degree was awarded.

The three subsequent bold numbers are the thesis reference number which combines to form a five-digit code used throughout the indices. Numbers have been allocated in the sequences 1 to 499 and from 500 onwards, resulting in a gap before the number 500.

The name of the candidate is given in bold characters in the form that was applicable at the time the degree was awarded; any subsequent name change has been ignored.

The name of the university granting the previous degree is listed enclosed in parentheses after the author's name. Where this university is in North America, the name of the country of this university has not been included. Every attempt has however been made to ensure that the names used are both clear and unambiguous.

The degree awarded appears next, followed by the title of the thesis within quotation marks.

The last component, enclosed in parentheses, identifies the name of the department or program in which the student was registered and the supervisor of the thesis. The department name is given here as it was at the time the thesis was written. If there were several thesis supervisors, their names are listed in the sequence shown in the thesis. Only the first initial of each supervisor is given except where ambiguity might thereby result.

Each year starts on a new page of the Annual Listing.

INDICES

The indices described below follow the annual listing.

1. Alphabetical List by Author

This index lists the authors of theses alphabetically without regard to year, department or degree. The thesis number and the degree awarded follow the author's name. Where students have submitted both a Master's and a Doctoral thesis within the index period of 1960 to 1973 there will be two entries for the same author. The thesis number is the key to the **Annual Listing** which gives full details of the thesis.

2. Alphabetical List by Department

This index provides a primary alphabetical listing of the department or program and within each listing an alphabetical sequence of authors as well as the thesis number and the degree awarded. For fuller comments regarding the use of department or program name, please see the comments on this topic in the previous section or in **Presentation of Data**.

3. Alphabetical List by Supervisor

This index provides an alphabetical listing of supervisory Professors and under each there is a listing of students together with the degree awarded and the thesis number. An asterisk preceding the author's name indicates that more than one Supervisor was responsible for the thesis; the other Supervisors may be ascertained by reference to the **Annual Listing** through the use of the thesis number.

4. List of Theses by Department

This index provides a numerical list of thesis titles sorted by department. As it has not been possible to classify the theses by subject this index provides a means by which titles are grouped together by discipline to facilitate searching by topic. For further comments regarding the use of department or program name, please see the comments on this topic in the previous section or in **Presentation of Data**.

Additional Lists

The Faculty of Graduate Studies and Research maintains other indices in addition to those published here. These can be made available on demand.

DEPARTMENTAL & PROGRAMME NOMENCLATURE

Indices 2 and 4 provide access to thesis information arranged under the name of the department or programme in which the student was registered. The departmental names employed in the Directory have been taken from contemporary records. As departmental names have changed and varied over the years there are some inherent difficulties in employing them as headings for locating theses produced in a particular discipline. In order to facilitate the use of indices a list of all departmental and programme names used, grouped by related disciplines, is provided below. It is essential to use this list in order to select the relevant headings for the names of students in a particular field or for theses on a particular topic. Both specific and general headings should be checked — e.g. "Biology" should be scanned as well as "Botany" for Botany theses due to the recent amalgamation of the Botany, Genetics and Zoology Departments into the Biology Department. Similarly synonymous terms should be examined, e.g. "Bacteriology", "Bacteriology & Immunology" and "Microbiology" etc.

Loans

Most McGill University theses may be borrowed through interlibrary loans from the university's libraries. The loan period for theses is two weeks, without renewal option. A paper or microfilm copy may be purchased through

Interlibrary Loans
McLennan Library
McGill University
3459 McTavish Street
Montreal, Quebec H2A 1Y1

Estimates are automatically provided by the Interlibrary Loans Service for theses for which circulating copies are not available.

Prepayment is not necessary if the order is placed through a recognized library, however, it is required for requests placed by individuals or corporate bodies.

Microfilm copies of McGill theses from 1967 onwards are available directly from:—

Canadian Theses on Microfilm

Copies of McGill University theses are made available strictly for the purposes of consultation. The literary rights of the author must be respected. No part of a thesis may be copied, closely paraphrased, or reproduced in any way without the previous written consent of the author. If the reader obtains any assistance from the work, he is expected to give proper credit in his own production.

ERRATA

Regrettably, despite a great deal of care, certain errors were only discovered as this volume went to press.

Theses 61-689 and 65-746 appear in the Annual Listing but do not appear in the indices.

Theses 64-023 and 68-136 appear in the Annual Listing, correctly showing the supervisor as Professor B. Margolis, a modification which is not reflected in the indices.

Thesis 65-738 has been modified in the Annual Listing, but Professor B. Steinberg does not appear as the thesis supervisor in the *Index by Thesis Supervisors*.

The following theses do not show the supervisors correctly, and are therefore drawn to your attention. They have not been corrected anywhere in this volume.
